### PRODUCT SPECIFICATION DATA

#### DESCRIPTION

4" Line voltage 120V Remodel Non-IC Airtight Small Aperture Housing. Insulation must be kept 3" away from the housing. Ideal for general, accent and task lighting.

#### FEATURES

- UL / cUL listed for damp location, feed-through wiring
- Thermally protected against misuse of insulation materials and improper lamping
- Sealed housing to prevent airflow from air conditioned or heated areas into ceiling
- Housing adjusts to accommodate various ceiling thickness
- Adjustable socket mounting plate for proper positioning of different lamp types
- Can be dimmed using standard incandescent dimmer

#### HOUSING

White painted steel housing is vertically adjustable (up to 1"), which allows housing to be flush with ceiling.

#### CLIPS

Four remodel tension clips secure the housing to the ceiling.

#### JUNCTION BOX

Pre-wired junction box with 7 1/2" knockouts with pryout slots and (4) romex knockouts with built-in strain relief to hold wire in place without any connectors. Junction box is equipped with grounding wire. Listed for through branch circuit.

#### LAMP & SOCKET

Medium base porcelain with nickel plated copper screw shell socket. Maximum of 50W R20/PAR20/PAR16; 40W A19.

#### INSTALLATION

- 5 1/2" height allows the fixture to be installed where 2x6 joist exists
- Housing can be installed from below the ceiling
- Four remodeling tension clips can accommodate 3/8" to 5/8" thick ceilings
- Comes with quick connectors which makes wiring connection easy. No wire nuts necessary.

#### LISTINGS

UL/cUL Listed for feed through and damp location.

#### DIMENSIONS

#### CEILING CUT-OUT 4 3/8"

A:	4 1/8" (106mm)	C:	4 3/4" (121mm)
B:	5 1/2" (140mm)	D:	11 3/4" (298mm)
